

Urban and Regional Planning Portfolio

By Alamudin Athoul Bahri

About Me

Profile

I'm Alamudin Athoul Bahri (Athok), a graduate of Urban and Regional Planning, Institut Teknologi Sepuluh Nopember (ITS) with a Cum Laude GPA of 3.71. I'm passionate about cities, how they grow, connect, and move. Strong interests in infrastructure, spatial analysis, and sustainability. I'm deeply interested in how planning, data, and design can come together to shape more livable and sustainable cities.

Selected Academic Projects

Urban Planning Studio – RDTR WP Sukolilo & Mulyorejo

Overview

This group project focused on preparing a Detailed Spatial Plan (RDTR) for WP Sukolilo and Mulyorejo. The study aimed to support organized urban growth through spatial structure planning, zoning regulation, and service provision at the district scale.

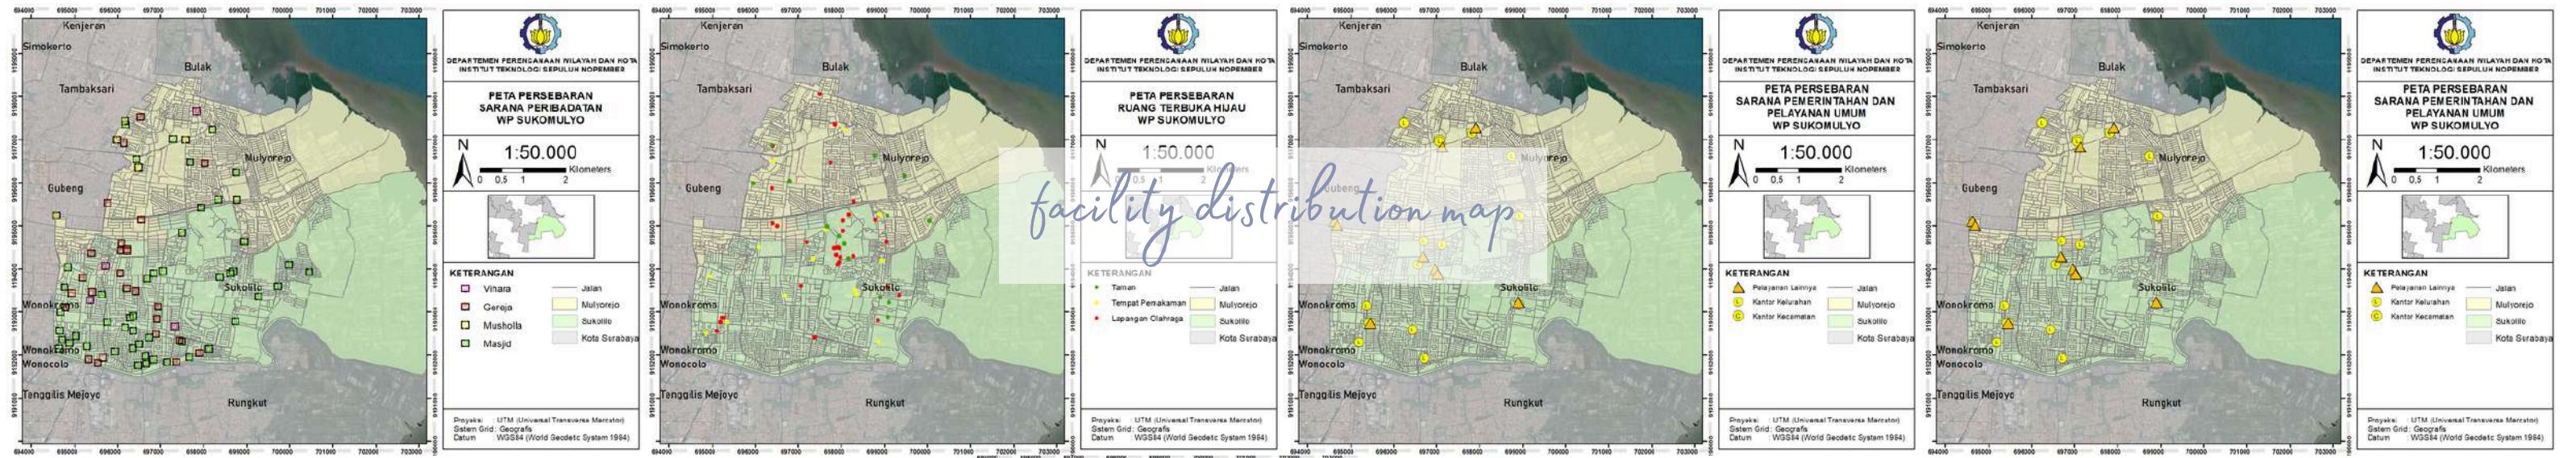

My Contribution

- Assessing existing public facilities within WP Sukolilo and Mulyorejo
- Identifying service gaps based on planning standards
- Supporting the allocation of facilities in the spatial plan and RDTR maps

Turning planning concepts into visual experiences

Organizational Experiences

Project Officer Wisuda 127 & 128 HMPL ITS

Himpunan Mahasiswa Planologi, ITS (Jan 2024- Mar 2024)

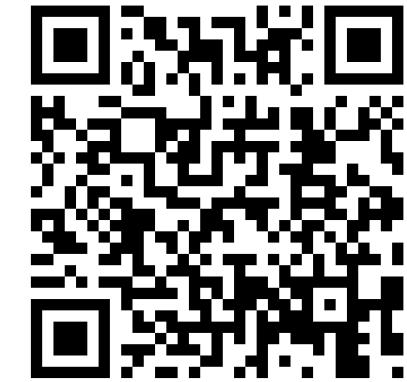

Overview

As the Project Officer, I was responsible for planning and coordinating the entire graduation event. I began by mapping the overall timeline, organizing team tasks, and holding discussions with various campus divisions to align technical and ceremonial needs.

Throughout the execution, I ensured smooth coordination among all committees, managed on-site operations, and maintained communication. The event ran successfully and received positive feedback from graduates for its well-organized and memorable experience.

2nd Place HANTARU Essay and Poster Design Competition

DPRKPP Surabaya, 2023

Overview

This project was developed for the HANTARU competition in the essay and poster category. The work translated planning ideas from the essay into a visual poster, supported by spatial concepts and 3D visualization using SketchUp. The competition entry was completed as a team project.

My Contribution

I was mainly responsible for designing and composing the competition poster, transforming the essay content and initial 3D models into a clear and engaging visual narrative. I focused on layout, visual hierarchy, and graphic clarity to ensure the planning ideas were easily understood by the jury.

Thank You
